WEEKLY SPEED READ

“THE SIGNAL IN THE CANYON”

Mrs. Strive stood in front of the giant mission screen as the new cadets entered the academy command room. A strange signal had appeared near the canyon cliffs outside the city, and Mission Control needed help investigating it. Each cadet received a map, flashlight, and explorer notebook before beginning the journey.

As the team traveled through the rocky trail, Mrs. Strive reminded everyone to observe carefully and record important details. One cadet noticed unusual markings carved into the canyon wall while another discovered footprints near the riverbank. Suddenly, the signal on their tracker began moving deeper into the canyon.

The cadets worked together to explore the area before sunset. By the end of the mission, they learned that courage, teamwork, and careful observation were the first skills every Strive Cadet must master.
